

Everywhere You Go

Business Network Server

Are you a small business owner, with employees in multiple physical locations? Do you travel a lot for business, yet cannot afford the investment associated with VPNs or third-party remote access providers? **myDitto is your answer!**

Already receiving accolades as a breakthrough business network server product to watch in 2010, myDitto has been named one of this year's CES Innovations Award winners.

myDitto Key

Your Entire Business Network on a USB Key

myDitto Key enables SoHo business professionals to access their myDitto Servers remotely, through an easy-to-use, lightweight USB key. From owners who frequently travel on business trips to telecommuting employees, users simply insert their myDitto Key into a laptop or PC and -- through a direct peer-to-peer connection -- safely access any critical file from their office network server no matter where they are.

Your Business Needs myDitto

Easy, Cost-Effective, Secure and Mobile

Easy:

- With no software installation required, users have instant access to their myDitto Server through their myDitto Keys

Cost-Effective:

- No need to rely on third-party remote access providers;
- Eliminates need to hire IT manpower needed for "emergency" remote user support;
- Fraction of the cost of VPN solutions

Secure:

- "Two-factor" security through personalized, authenticated USB keys coupled with password-protection; once key is removed, there is no trace of any content left behind on the device

Mobile:

- Rapid, peer-to-peer connection to remote files;
- Accessible through mobile handhelds: Windows® Mobile 6.1 and higher, iPhone®

Simple. Secure. Accessible.

Back up, access and protect all your digital assets

Everywhere You Go

Business Network Server

How it Works Easy Enough for a Novice

Step One: Connect Dane-Elec's myDitto Server to the router. Since the device is plug 'n play, absolutely no configuration is necessary.

Step Two: With up to 30 keys available, a business owner can create password-protected, individual myDitto Keys for each employee.

Step Three: Within the office or away, users are now ready to access the myDitto Server through their myDitto Keys plugged into their devices, from anywhere.

myDitto Server

Enterprise Network Benefits, Yet Fraction of the Cost

myDitto Server was also designed as an out-of-box, easy-to-use business network server for SoHo businesses. For companies that can't afford the costs associated with implementing and running an enterprise-like network server, myDitto Server is a cost-effective alternative to centralizing data in one location.

With no technical knowledge required, users within the office can easily transfer and access data to and from myDitto Server through both wired and wireless devices including: PCs, Laptops, PDAs and smart phones.

Benefits Include:

Zero configuration:

- Designed for non-technical users;
- Eliminates need for IT maintenance services

Efficiency:

- Creates efficiency within an organization by centralizing critical business files and digital assets;
- Ensures access to, and collaboration on, the most up-to-date documentation, sales tools and marketing material;
- Backs up different PCs to one, centralized location;
- Synchronizes uploaded files from myDitto Key with ones already on the network

Security:

- Enhanced protection through mirroring (RAID 1) data redundancy by using two hard drives on the myDitto Server;
- Administrator has the power to cancel myDitto Keys that have been stolen/lost

Specifications

Max. capacity	2 x 2TB
Transfer rates	10/100/1000 Mbps capable
Interfaces	Ethernet / 2 x USB 2.0 ports for single-touch copy
Hard disk	SATA I and II compatible / RAID 0 and 1
Multimedia	UPnP and DLNA compatible
Dimensions	W: 3.31in , 77mm / D: 6.49in , 165mm / H: 7.48in , 190mm
Weight	1.19 Kg / 2.62 lbs (not including hard drives)
Warranty	1-year limited

System requirements

Ethernet router / Broadband Internet connection

Compatible with the following operating systems
